

ESET MANAGED DETECTION & RESPONSE

Enhance your protection against potential security issues with customized managed detection and response (MDR) services.

Today's cyberattacks are sophisticated, targeted and increasingly difficult to detect.

Together with our products, ESET's Managed Detection and Response Service creates a complete security solution that:

- **Delivers proactive threat hunting and robust analysis of potentially harmful files**
- **Provides effective help in the investigation of incidents and security challenges**
- **Implements response and remediation steps to ensure business continuity**

ESET Detection and Response Ultimate is our full-service MDR package, built around our EDR solution, ESET Inspect.

KEY BENEFITS

Proactive Threat Hunting

Investigates data, events and detections generated by ESET Inspect. All client data remains secure while ESET Security Specialists review highlighted alarms, investigate potential root causes, and compile their findings into status reports with actionable advice.

Threat Monitoring

ESET Security Service Agents monitor ESET Inspect for each client's data daily, issue alerts, compile clear reports and recommend action.

Deployment and Upgrade

Installs and configures specific products in the client environment to ensure their successful operation, reducing the overall complexity associated with a new and upgraded endpoint security product and ensuring business continuity. A thorough initial assessment before each execution or deployment ensures there are no surprises.

WHY ESET

- Keeping up with the rapidly changing cyber threat landscape can be challenging and is usually best left to experts. At ESET, we have been leaders in digital security research and innovation for more than 30 years.
- Utilizing new, complex security solutions can be difficult even for organizations with dedicated security or IT teams. Focusing on the implementation and operation of new tools can divert the focus of an IT team, which may prevent it from executing core operations vital for business continuity.
- Creating dedicated teams and/or hiring security specialists who have the necessary skills and qualifications to investigate, identify and respond to potential cybersecurity threats can result in high long-term costs.
- ESET MDR services let you focus on what you do best—while we work quietly in the background, 24/7, to keep you safe.
